COLORADO VNET TO OFFER CD CONVERSION SERVICE FOR VIBE AUDIO

SERVER WITH READYTOPLAY

First CD Conversion Service to Be Sold Directly By The Manufacturer

PALO ALTO, May 9, 2007 -- ReadyToPlay, the leading CD conversion service in the U.S., and Colorado vNet, an emerging leader in the custom building automation market, announced that Colorado vNet will now offer CD conversion for the Vibe Audio Server. The new service offering for the Vibe Audio Server will be sold by Colorado vNet and its dealers and distribution partners in the U.S. and Canada. Dealers may now purchase a packaged CD conversion directly from Colorado vNet along with the Vibe Audio Server.

“This is a validation of the importance of quality CD conversion and content loading”, said Jeff Tedesco, President of ReadyToPlay. “Colorado vNet recognized the value of the customer’s music collection being properly converted and ‘ReadyToPlay.’ Colorado vNet is the first manufacturer to sell CD conversion with its audio server as part of a total solution.”

“We chose ReadyToPlay as they have worked with us from early on to create a ripping solution tailored to deliver the audio and data quality our customers demand from

the Vibe Server experience,” said Mike Malone, Vice President of Sales for Colorado vNet. “Since we both have invested in the use of the AMG music database to deliver album art and metadata, it just made sense to include ReadyToPlay’s customized DataGroom™ process to ensure that our integrators and their customers will receive the highest quality digital music library possible.”

Colorado vNet will sell three bundles for CD conversion at the 200, 400 and 600 CD order levels. In addition to CD conversion to the WAV format for loading on the Vibe Audio Server, customers will also receive an MP3 format version for their portable player devices.

Company Information

ReadyToPlay, Inc. is a privately held company based in Palo Alto, California, that provides digital music services including CD conversion, media server and portable digital audio device loading.

ReadyToPlay offers these services to customers through home audio server manufacturers such as ReQuest, ELAN HomeSystems, Sonos, Russound, Colorado vNet and Integra and retailers such as Cambridge Soundworks, Magnolia Audio/Video.
